3G Portable Wireless USB Cellular Router

Create and share your own personal WiFi *HotSpot anywhere*

Are you still using “dial up” for an internet connection? Do you live in an area where Hi-Speed Cable or DSL are not an option? Would you like to create your own Wifi Hotspot anywhere? Aluratek introduces its new 3G / 4G Wireless USB Cellular Routers that allow you to get Hi-Speed internet access anywhere you get a cellular signal. Simply insert your USB cellular 3G / 4G modem into the router’s USB port and you are all set.

This is the perfect solution for setting up mobile work stations, providing internet access for conventions, tradeshows, and hotel rooms. Perfect for creating an instant HotSpot to allow multiple users to share internet access on cross country trips in a car, van or RV. Ideal for emergency services and first responders and many others.

- Create instant WiFi hotspots at any location where you have a 3G connection
- Built-in lithium-ion battery (up to 4 hours of continuous use)
